# Introduction to Wi-fi Privacy Camera

Wi-fi Privacy Camera is an indoor camera with a "**Care**" function that includes a call button that allows you to call the user of the account to which the camera is connected.

Take care of your loved ones from a distance!

# Preparing your network and phone

Installing the app on your phone

- **Download the APP**
- Connect your smartphone to a 2.4 GHz Wi-Fi network -Only 2.4 GHz Wi-Fi networks are compatible with the Wi-fi Privacy Camera.
- Open the Orange Smart Home app and sign up or log in if you already have an Orange Smart Home account

- Follow the on-screen instructions to add the Wi-fi Privacy Camera to your network
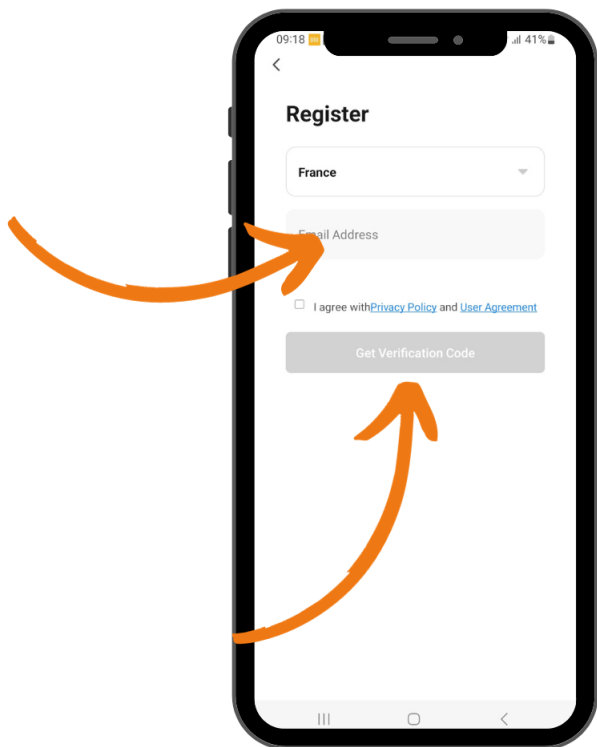

- Enter your email address

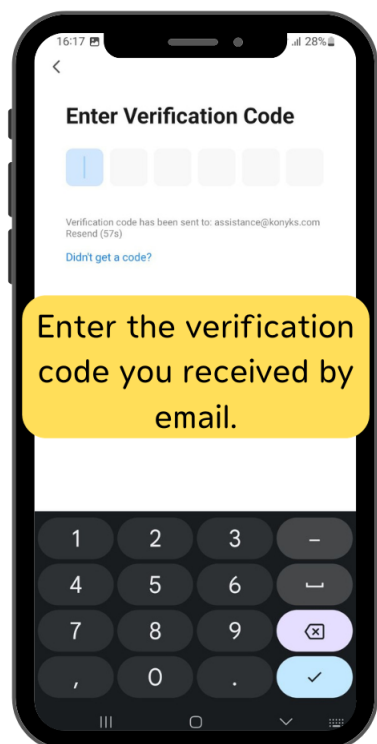

Installing the Wi-fi Privacy Camera

- Plug the camera using the cable and power adapter provided with your camera.
- Carefully open the camera's lens cover and remove the transparent film covering the lens.
- The camera plays a 3-note jingle and and the indicator light will flash red. The red blinking of the indicator light

indicates that the camera is ready to be paired.

- Open the Orange Smart Home app.
- Once the camera is paired, it performs a few rotations to self-calibrate. Wait for the calibration to finish before starting to use the camera.
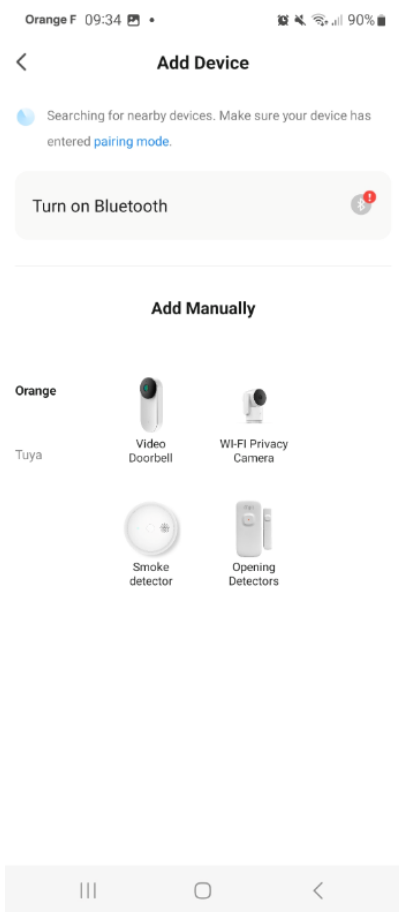

- Add your Wi-Fi Privacy Camera.
- Follow the synchronization process.
- Enter the password for your 2.4 GHz Wi-Fi network.
- Your phone screen should display a QR code.
- Place your phone approximately 15 cm from the camera's lens.
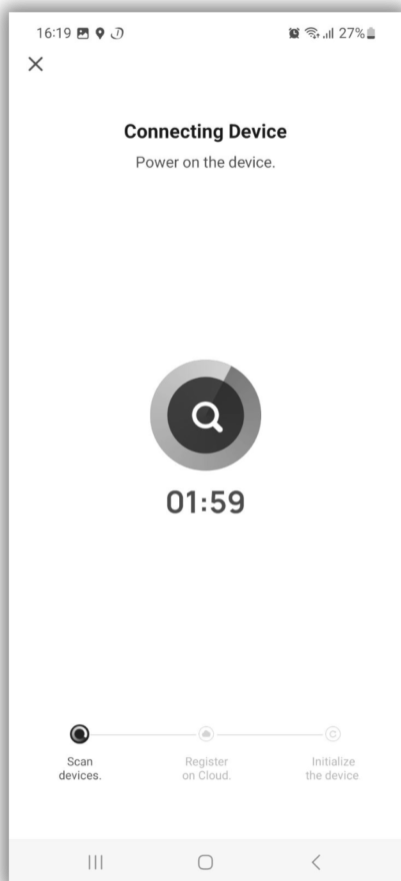

- A progress indicator will appear; when it reaches 100%, the device will be successfully added.
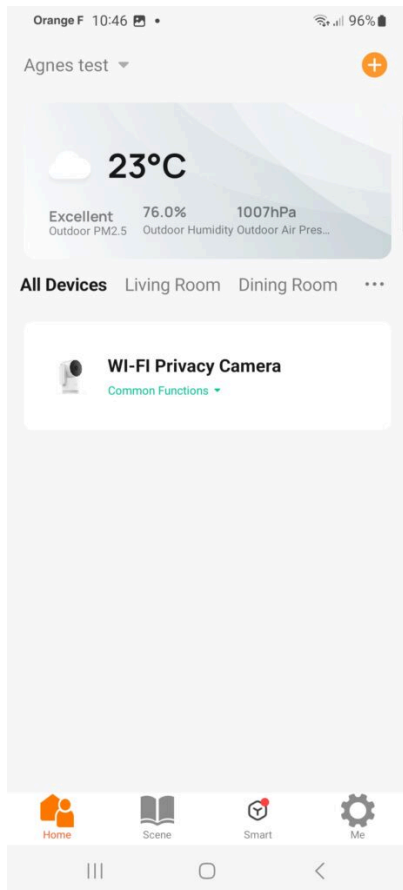

During installation, ensure that your smartphone is connected to a **2.4 GHz Wi-Fi network** only. Some router networks offer unified 2.4 and 5GHz networks. If necessary, disable the 5GHz networks during installation.

If the connection fails, in 95% of cases, it's due to one of the following problems:

1. The password entered for the Wi-Fi network is incorrect (pay attention to uppercase/lowercase).
2. Your Wi-Fi network is in 5GHz, not 2.4 GHz.
3. Your Wi-Fi network signal is too weak; move closer to the router.

Connection with Google Home and Alexa

First, make sure your voice assistant is connected to the internet and functioning correctly.

For Google Home:

- Open the Google Home app.
- Click on the "+" icon.
- Set up a device / Works with Google.
- Choose the Orange Smart Home app.

For Amazon (Echo, Alexa):

- Open the Amazon Alexa app.
- Choose Skills and then select the Orange Smart Home app.
- Enter the credentials used to log in to the Orange Smart Home app.
- The voice assistant will search for available devices and display them in the device list in the Google Home or Alexa app.
- If this doesn't happen, tell your voice assistant, "OK Google, sync devices" or "Alexa, sync devices."

- Then you can instruct your Chromecast/Google Nest Hub/Alexa Echo Show to display the living room camera, for example.

Using the Wi-fi Privacy Camera
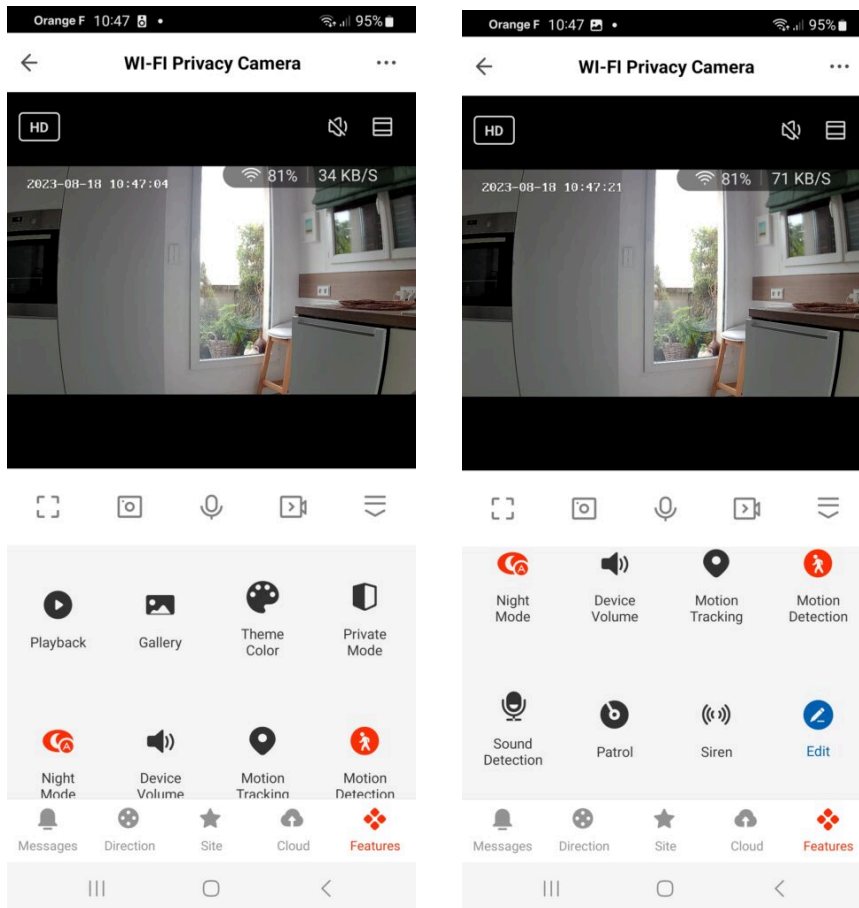

On the Wi-fi Privacy Camera home screen, you will find several options:

: Expand your camera's image to full screen.

: Take a photo

: Speak into the Wi-Fi Privacy Camera's microphone

: Record a video

: Hide the menu and options

- **Playback**: View recorded videos on your SD card.
- **Gallery**: Access your saved photos here.
- **Theme color**: Customize the camera's interface color.
- **Private mode**: Mute the microphone and switch off the camera's eye.
- **Night mode**: Set if the Wi-fi Privacy Camera automatically switches to night vision.
- **Device volume**: Adjust the camera's sound volume.
- **Motion tracking**: Indicate if the camera follows motion or not.
- **Motion detection**: Notify if the Wi-fi Privacy Camera detects motion.
- **Sound detection**: Notify if the camera detects sound.
- **Patrol**: Schedule the camera for surveillance by rotating itself
- **Siren**: Trigger a siren to deter intruders.
- **Edit**: Customize the camera's home screen with your preferred options.
- **Messages**: Notification center for Wi-fi Privacy Camera.
- **Direction**: Control the camera's eye movement.
- **Site**: This function allows you to save predefined locations in a room. This function is not directly related to motion detection.
- **Cloud**: Purchase an online storage service for your camera.

Features

On the Wi-fi Privacy Camera, there is an emergency button located on the front of the camera.

Pressing this button triggers a call to your phone when a person feels in danger or needs assistance

If you connect to the same account from multiple phones, all the phones will receive incoming calls.

If you share the Wi-fi Privacy Camera with another account, both accounts will receive incoming calls.

Inserting a Micro SD Card

The micro SD card is inserted under the head of the Wi-Fi Privacy Camera, and you can move it using the directional arrows in the app.

Removing the Wi-fi Privacy Camera

- From the home screen of your camera, go to the three small dots in the upper right corner.
- Scroll down to the bottom of the menu and choose "Remove device." Confirm your choice.
- You can now reinstall, move, or gift it securely.
- For security reasons, cameras that have not been properly uninstalled will remain "blocked" and cannot be reinstalled.

Resetting the Product

- Press the button on your Wi-Fi Privacy Camera for about 20 seconds.
- The camera will emit 3 beeps, and the camera's light will change from green to red.
- After about 10 seconds, the red LED will flash rapidly, indicating that the camera is ready to be paired.
- If the camera is successfully paired, the indicator will change from red to green.

Creating a scene or automation

You can create a scenario with your Wi-fi Privacy Camera, for example:
If the Wi-Fi Privacy Camera detects motion, **then** turn on the living room light (if you also have a connected bulb).
In the smart scene tab, press the + button in the upper right and choose when the device status changes.
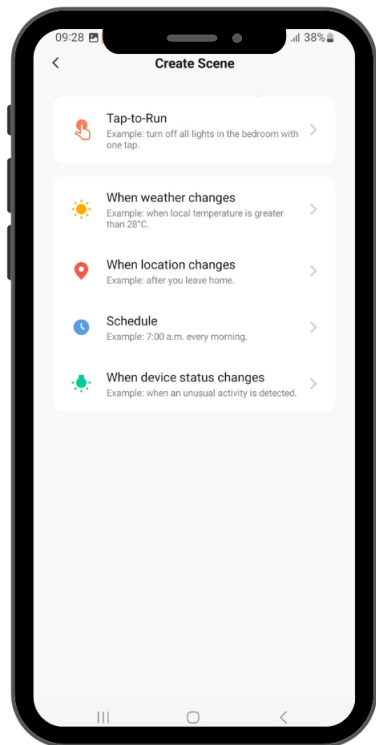

Select your Wi-Fi Privacy Camera and check motion detection.
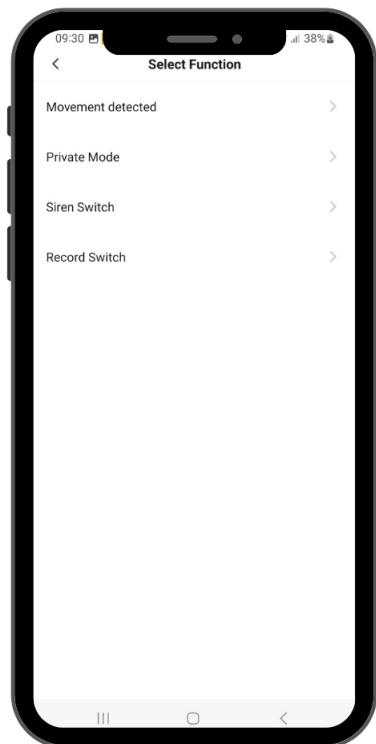

In the category, press the small + button, choose execute the device, select your bulb, and set it to "On."

Don't forget to save your new smart scene!
